Development Practices: Agile/Scrum Methodologies, CI/CD, DevOps Culture, APIs

WORK EXPERIENCE

Frontend Developer   01/2023 - Present
Este Medical Group, London, UK
- Integrated Pabau CRM and admin portal APIs, reducing client data retrieval time by 20%.
- Developed modal components for network failure, success, and warning responses, enhancing code quality and project usability.
- Led technical design discussions, contributing to architectural decisions that ensured application scalability and robustness across all browsers, improving performance by 30%.
- Utilized modern authorization mechanisms such as JSON Web Token (JWT) for secure access control.

React Frontend Developer   02/2021 -11/2022
Fugetron Corp, Mumbai, India
- Developed sophisticated web applications using React.js, JavaScript and Redux, improving operational efficiency.
- Integrated and utilized RESTful APIs, WebSocket APIs, ensuring seamless data response between front-end and back-end services.
- Implemented AWS Multi-factor Authentication (MFA) to strengthen authentication processes, reducing unauthorized access incidents by 30% and enabling seamless admin access to user accounts.
- Implemented and maintained CI/CD pipelines with Bitbucket to streamline deployment processes.

Product Engineer   02/2018 – 11/2020
Space Enterprises, Mumbai, India
- Provided engineering support for switch and router product lines, improving quality by 15% and reducing defects by 10%.
- Led product design from concept to production, achieving a 20% cost reduction through continuous improvements.

EDUCATION

Masters in Data Science, *London South Bank University*   09/2022 - 09/2023
Bachelors in Electronics & Telecommunications, *University of Mumbai*   07/2015 - 06/2018
